This is a printable model of a Fennec from Rocket League

Credit to Adam Williams for the original model (<https://www.artstation.com/notadam>)

I cleaned up the shells and made it solid for printing, thickened the wing, and used some Dieci wheels I had from another design.

Just print the Fennec as is, supports shouldn't be needed, then print 2 of each type of wheel and glue together.

Check out my collection for more car models: <https://www.thingiverse.com/PsychItsMike/collections/print-in-place-with-moving-wheels-no-supports-car-collection>
