Summary

Octane from Rocket League that requires minimal supports

[Toys & Games](#) > [Vehicles](#)

Tags: [videogame](#) [car](#) [easytoprint](#) [easyprint](#) [rocketleague](#) [racingcar](#)

Self modelled Octane, made easy to print.

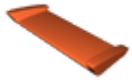

The body will require supports for the build plate only, and I recommend either a thin or variable layer height for the upper details.

Glue will be required for attaching the spoiler.
